ANNOUNCEMENTS AND SPECIAL NOTICES

This issue presents preliminary financial results for the securities industry in 1984, based on preliminary data for the first nine months and projections of the final three months. Complete results will be presented in a later issue.

Also, a new annual statistical table, A-390, which presents summary historical gross proceeds from primary public offerings by type of security and industry of issuer appears for the first time in this issue.

THE SECURITIES INDUSTRY IN 1984: PRELIMINARY RESULTS

The securities industry was not as profitable in 1984 as it was in 1983. 1/Based on preliminary results for the first 9 months and projections for the final three months, aggregate industry revenues rose about 6% to \$39.3 billion and pre-tax income declined 50% to \$2.6 billion. Nevertheless, capital employed in the industry grew 18% to \$22.6 billion. 2/

During the first nine months of 1984, aggregate industry revenues rose only 4% to \$28.5 billion, while expenses increased 15% to \$26.2 billion. As a result, pre-tax income fell 61% to \$1.8 billion from \$4.5 billion in 1983. Nevertheless, capital employed in the industry grew 16% to \$20.9 billion.

Financial results of carrying and clearing broker-dealers through the first nine months of 1984 are presented in Exhibits 1 through 4 and highlighted below. 3/ These firms accounted for 89% of the industry's capital base at the end of the third quarter of 1984. Data for firms that neither clear securities transactions nor carry customer accounts are presented in Exhibit 5.

Financial Results of Carrying and Clearing Firms: Highlights

Securities commission income from stock and options transactions declined by \$786 million (17%) from 1983 as trading volume in the securities markets fell 3%. Underwriting profits from offerings of corporate and municipal securities was reduced to \$2.0 billion (30%) as the level of these offerings declined 29%. Margin interest rose by 47% to \$2.3 billion from its 1983 level. This increase together with the increases of \$1.8 billion (53%) in other revenues related to the securities business and \$518 million (58%) in revenues from non-securities-related activities offset declines from the "core" securities revenues to provide modest growth in total revenues.

The pre-tax profit margin and return on equity of carrying and clearing firms shrank by nearly two-thirds to 6% and 10%, respectively, in 1984 from the year before. The sharp downturn of these profitability measures was due principally to the growth in interest expenses, up \$3.1 billion (68%). At the

^{1/} For purposes of this report, the securities industry consists of broker-dealers which file a regulatory report (FOCUS Report) with the Securities and Exchange Commission. The number of these broker-dealers increased from 4,426 on September 30, 1983 to 5,471 on September 30, 1984.

^{2/} Projections are based on results reported by NYSE member firms doing a public business. Final full year results will be published in the SEC Monthly Statistical Review as soon as they are available.

^{3/} Carrying and clearing broker-dealers are securities firms that maintain possession or control of customers' cash and securities or clear securities transactions. The number of carrying and clearing firms rose from 1,271 in 1983 to 1,314 in 1984.

same time compensation for registered representatives declined by \$600 million (12%) indicating a retrenchment from the expansion programs which prevailed through all of 1983 and the beginning of 1984.

Owners' equity grew to \$15 billion at the end of September 1984 from \$13.5 billion 12 months earlier. About 45% of this growth came from retained earnings. Additional paid-in capital accounted for the remainder. Capital also was augmented by an additional \$1.3 billion of subordinated debt, a 54% year-to-year increase. At the end of the third quarter of 1984 subordinated debt accounted for 20% of total capital compared to 15% a year earlier.

Total assets and liabilities grew about 22% during the 12 months ended September 30, 1984. Dealer related assets were primarily responsible for the growth in assets. Securities purchased under agreements to resell (reverse repos) rose to \$92.4 billion (47%) and accounted for 65% of the increase of total assets. Long positions which increased \$81.5 billion (21%), provided most of the remaining asset growth. The aggregate of agency related assets decreased by \$4.3 billion.

Almost 90% of the asset growth was financed by three liability categories: securities sold under agreements to repurchase (repos), short positions in dealer inventories and bank loans. Repos increased \$25.3 billion (30%), short positions rose \$9.6 billion (30%) and bank loans grew \$6.4 billion (61%).

Capital and Reserve Requirements of Carrying and Clearing Firms

To protect customers of broker-dealers, which often hold large amounts of customers' funds and securities, Section 15(c)(3) of the Securities Exchange Act of 1934 gives the Securities and Exchange Commission authority to establish minimum financial responsibility requirements for all broker-dealers and to regulate the use of customers' deposits or credit balances. Data relating to two regulations established under this authority — the net capital rule (Rule 15c3-1) and the reserve-segregation rule (Rule 15c3-3) — are presented in Exhibits 6-11.

Exhibit 6 shows the major components of total capital, for carrying and clearing broker-dealers, from the regulatory perspective of the net capital rule. Exhibit 7 shows the aggregate amount of monies obtained by broker-dealers from the use of customers' funds and securities (Reserve Formula credits), the amount that they could use to finance assets (Reserve Formula debits) and the amount that they were required to set aside in special bank accounts for the exclusive benefit of their customers ("Rule 15c3-3 reserve deposits"). Exhibits 8-11 show how the amount of excess debits (or credits) fluctuates monthly relative to the amount of credits or debits included in the Reserve Formula. Declines in excess debits (or increases in excess credits) may increase a broker-dealer's Rule 15c3-3 reserve requirement and its liquidity needs. 4/

^{4/} Rule 15c3-3 reserve deposits must be made in the form of cash or "qualified" securities. A "qualified" security is a security which is backed by the full faith and credit of the United States.

STATISTICAL HIGHLIGHTS

Market Statistics

The market value of equity/options sales on U.S. securities exchanges for January and February 1985 was \$205.6 billion, a 10% increase over the \$186.6 billion for the same months in 1984.

The value of stocks traded during the two months in 1985 was \$195.2 billion, compared to the \$176.6 billion for the same month in 1984. The volume of stocks traded increased 14% from 5.5 billion shares in 1984 to 6.3 billion in 1985. The market value of equity options traded (puts and calls combined) on the exchanges totaled \$5.2 billion in February of 1985, a decrease of 33% from the \$7.8 billion traded in the same year—earlier period and contract volume was 20.8 million, a decrease of 16% over the corresponding period in 1984 (Table M-120).

The number of put contracts traded during the first two months of 1985 decreased by 1.9 million or 28% to 4.8 million in 1985 from 6.7 million traded in 1984. The value of these contracts declined from \$1.7 billion in 1984 to \$841 million in 1985. The number of put contracts exercised and their dollar value declined by 72% to 284 thousand and by 76% to \$1,363 million, respectively. The number of call contracts traded decreased by 11% to 16.1 million and their value declined by 29% to \$4.3 million over their 1984 levels. The number of call option contracts exercised decreased 33% and their value decreased 51% (Table M-210).

Open interest in put options totaled 1.9 million contracts at the end of February 1985 compared to 1.8 million in February 1984. Open interest in call options decreased from 6.6 million contracts to 6.0 million contracts for the same month.

Offering Statistics

Primary public offerings during the first two months of 1985 totaled \$13.4 billion. This was 27% below the \$18.3 billion for the comparable 1984 period. The 372 offerings this year were 19% less than the year earlier. Issues offered through February 1985 averaged \$35.9 million compared to \$39.8 million for the same period last year (Table M-350). Non-convertible bond sales decreased 43%, (Table M-371) and preferred offerings decreased 53%, (Table M-373). Other types of securities offerings combined (convertible bonds, conventional common stock and other equity) increased \$5.8 billion from the \$4.9 billion offered a year earlier (Tables M-372, M-375 and M-376).

Large increases occured in offerings by issuers in the Manufacturing, Transportation and Communication sectors, while offerings by Extractive, Financial and Real Estate, and Commercial firms declined.

Registration Statistics

Registrations which became effective through February 1985 totaled \$34.4 billion, 8.9% above the comparable 1984 figure, and included \$27.1 billion for immediate and extended cash sales and \$7.4 billion for registrations for non-cash transactions (Table M-450).

The 92 corporate delayed registrations filed through February '985 averaged \$178 million. These registrations are comparable in '985 to the corporate delayed registrations filed through February 19%. Through February of this year corporate delayed registrations represented '% of the immediate and extended cash sale total. Registrations for initia primary and secondary common stock offerings totaled \$475 million, versus \$75. million through February 1984.

^{**} Excludes dollar value of equity options exercised.

NA= Not available

(See Explanatory Notes)

Includes all exchange trades of puts and calls in stock indices options, interest rates options and foreign currencies options (Tables 230, 240, 250). Includes all exchange trades/exercises in put and call options on individual stocks. Value and volume of puts and calls trading and exercises are shown in Tables M-210. Includes dollar value of equity options exercised.

EXPLANATORY NOTES

Market Value and Volume of Equity Security Sales on U.S. Securities Exchanges

Data on the value and volume of equity security sales are reported in connection with fees paid under Section 31 of the Securities Exchange Act of 1934, as amended by the Securities Acts Amendments of 1975. The reports include odd-lot, as well as round-lot, transactions.

Data of those exchanges marked with an asterisk cover transactions cleared during the calendar month; clearance usually occurs within five days of the execution of a trade. Data of other exchanges cover transactions effected on trade dates falling within the reporting month. The inconsistency introduced by these two different methods of aggregating the data is not considered to be significant, and, accordingly, all registered exchanges are aggregated and reported in monthly summaries.

Stock trading data include the trading of voting trust certificates, certificates of deposit for stocks, and American Depository Receipts for stock.

Trading in rights is included in the warrants trading data for all periods prior to January 1972.

EXPLANATORY NOTES

Exchange-Traded Options

A call option gives the purchaser the right to buy and a put option gives the purchaser the right to sell the underlying unit at a specified price by a specified date. Underlying one stock option contract is 100 shares of stock. Amounts underlying foreign currency options vary with each currency. Foreign currency options are traded on the British pound, Canadian dollar, West German mark, Swiss franc, the French franc and the Japanese yen. Interest rate options are traded on specific issues of Treasury bonds, Treasury bills, and Treasury notes.

Unlike other option products, stock index options are settled in cash. Broad based stock index options are based on an index of a group of stocks that reflect the overall market. Narrow based stock index options are based on a group of stocks that represent a specific industry.

The expiration date of an option is the Saturday following the third Friday of the designated expiration month. Nearly all index options expire monthly. All other options expire quarterly and belong to one of three expiration cycles: (1) January-April-July-October (2) February-May-August-November; and (3) March-June-September-December. Options are traded in the nearest three of the four expiration months of a cycle, thus, options with nine different expriation months are traded simultaneously.

The number and dollar value of call and put stock option contracts sold monthly by each exchange are reported in Table M-210. Contract volume includes both opening transactions (which establish new long or short options positions) and closing transactions (which eliminate long or short option positions). Long positions in options are eliminated through closing sales, exercise, or expirations.

Call and put contract volume of broad based index options and narrow based index options, by exchange, are reported in Tables M-230 and M-240, respectively. Call and put contract volume of foreign currency and interest rate options, by exchange, are reported in Table M-250.

Figures may not add due to rounding p = preliminary $\frac{1}{L}$ Equity securities other than conventional common stock, such as limited partnership interests, voting trust certificates and condominium securities.

EXPLANATORY NOTES

Primary Public Securities Offerings

The Commission's statistical series on primary offerings includes primary issues offered to the public for cash and registered with the Commission pursuant to the requirements of the Securities Act of 1933, or exempted from registration pursuant to the Regulation A or other exemption. Generally excluded from the series are: debt securities with maturities of less than one year; secondary offerings; non-cash offerings; issues exempt under Section 2(1) of the Securities Act of 1933; domestic government securities; offerings of non-profit and/or charitable groups; securities offered only on an intrastate basis; employee stock plans; open-end investment company issues; intracorporate securities transactions and sales to foreign purchasers. Issues registered for offering and later withdrawn are excluded from these offerings data but are included and shown separately in Total Effective Registrations (Table M-450).

The registration statements filed with the Commission by issuers are the primary sources of information for registered offerings. For some registrations, the offering date may fall in a later month than the effective date of such "shelf" registrations. Prior to January 1977, such offerings and registrations were accounted for in the respective months when the offering and registration took place. In the statistics published for January 1977 through April 1982, however, when the use of such shelf registrations for primary cash offerings usually entailed only competitively-bid offerings, the registration and offerings of such securities were both accounted for in the month of registration. With the adoption of Rule 415 (a)(1)(i) [17 CFR 230.415 (a)(1)(i)] (the "shelf rule"), the value of securities registered for delayed offering rose dramatically and accounting for the offering of such securities in the month registered rather than in the month in which the offering to the public actually took place would seriously distort the offerings data. Accordingly, securities registered in shelf registrations since May 1982 appear in the registration statistics (Tables M-450 through M-470) in the month of registration and in the offering statistics (Tables M-350 through M-376) in the month of offering.

Information on interstate public offerings of securities exempt from SEC registration requirements, which is shown separately in Table M-350, is obtained from the Federal Reserve Board. Types of securities included are railroad equipment trust certificates, mortgage-backed bonds of savings and loan associations, or corporate bonds which are guaranteed as to principle and interest by the United States Government.

Explanatory Notes, Primary Public Securities Offerings (continued)

Corporate offerings include securities offered by corporations and non-corporate business enterprises such as limited partnerships. Foreign government offerings include offerings of foreign governments, foreign government agencies and foreign government-owned enterprises.

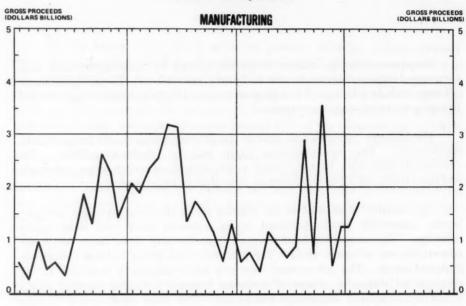

The industry classifications used in the offering tables should be nearly self-explanatory. The communication group includes telephone utilities. The commercial and other industry group covers agriculture, construction, wholesale and retail trade, and all service activities other than financial services.

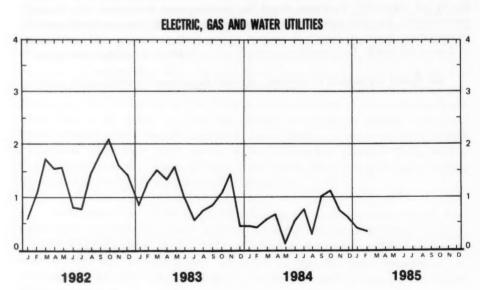

The security types used in the offering tables are non-convertible (straight) bonds, convertible bonds, preferred stocks, common stocks and other equity offerings. The convertible bond category includes only those issues which are convertible into common stock. The preferred stock group includes convertible preferred stock. The conventional common stock category is restricted to the conventional ownership shares of corporate business (including common shares issued by closed-end investment companies). The other equity group consists largely of ownership securities issued by non-corporate businesses, (i.e. limited partnerships), but also rights and warrants offered by corporations, certificates of participation, shares of benefical interest, voting trust certificates and certificates of deposit for stock. Depository receipts are not included in the offering statistics.

All figures are subject to revision. Revised figures will be indicated by an "r".

EXPLANATORY NOTES

Security Registrations

All registrations which became effective under the Securities Act of 1933 are included. Total Effective Registrations, Table M-450, includes cash and non-cash issues. Issues are included as of the effective date.

The primary corporate offerings classification includes registered offerings for immediate cash sale where the proceeds of the offering are received by the issuing corporations. Secondary offerings are registrations of outstanding securities where the proceeds of the issue do not accrue to the issuing company. The dollar amount for either type of offering is based on the registered offering price. The unseasoned common stock classification includes public offerings by companies registering common stock for the first time under the Securities Act of 1933. The other equity securities classification consists of offerings of certificates of participation or beneficial interests, warrants or options, voting trust certificates and other equity securities not elsewhere classified.

Issues offered for extended cash sale include investment company issues, employee plans and depository receipts. Depository receipts include American, European and domestic depository receipts. The foreign government classification is shown separately, whereas registrations by foreign corporations are included with U.S. domestic corporate offerings. Investment company securities include open-end, face-amount and unit trust offerings, as well as variable annuities. L/Closed-end">L/Closed-end investment company securities are included in primary corporate offerings.

Beginning with the July 1982 Review, Table M-465. As been modified combining certain investment company registrations and separately reporting registrations for delayed corporate offerings. The investment company registrations for face amounts and variable annuities have been combined in one figure listed under the column headed "Other". The Corporate delayed registrations include "shelf" registrations and competitive bids that are registered but not offered in the month in which they are registered. Principally these are registrations for delayed offerings registered pursuant to Rule 415(a) (1)(i) [17CFR 230.415 (a)(1)(i)].

Issues registered for other non-cash purposes, such as exchange transations, securities given for property or services, or securities reserved for conversion, are valued at current market prices.

Data on withdrawals, in Table M-450, include the number and amount of registration statements that have been completely withdrawn.

- Beginning with January 1978, the total amount registered for investment companies was eliminated. However, total registrations of investment companies was retained in the tables due to the adoption by the Commission of Rule 24f-2 [17 CFR 270.24f-2], effective November 3, 1977. This rule allows certain registered investment companies to register an indefinite number of securities for sale. Each issuer must file a notice at the end of the fiscal year identifying the number of securities sold and remit the corresponding registration fee.
- 2/ Before November 1983 this table was numbered M-430.

PUBLIC AVAILABILITY OF THE NEW, UNIFIED ROS FILE

The SEC has prepared a new, unified computer tape containing the Registrations and Offerings Statistics File ("ROS File"). The ROS File contains a record of each offering registered under the Securities Act of 1933 and each offering exempt from registration under Regulation A of that Act.

Previously, the ROS File was available on two computer tapes, one covering the period 1970 through 1976 and another covering 1977 through the first ten months of 1981. Now the ROS File tape covers records from January 1970 to within four months of the currently published month. Each record contains 92 possible variables identifying characteristics of an issue and its issuer. Records for the period January 1970 to December 1976 have possible entries for only 54 of the 92 variables on the complete record layout.

All records contain data on security type, type of offering, price per security, dollar amount of the offering, method of distribution and whether the sale is of a primary or secondary nature. CUSIP numbers have been included for securities which have been assigned such identification. Issuer data include SIC (industry) Code, issuer's name and Zip Code.

The later records, for the years 1977 to present, include additional detailed data on underwriter's name, spread, reallowances and selected financial data relating to the issuing firm.

The computer tape of the ROS File has been provided to the National Archives and Records Service of the General Services Administration. Copies of the ROS File tape and related documentation are available for purchase from that agency. The price per copy for one reel @ 6,250 BPI is \$104.00 plus \$25.90 for documentation in print form. Interested parties can make special arrangements with the Archives to obtain the computer tape in a different configuration which will be compatible with the user's hardware at additional cost. Documentation requested as microfiche without the database is \$5.00 (\$5.00 minimum order) and with the database, \$.60 each. Prices are subject to change. A check or money order should be made payable to the National Archives Trust Fund. In ordering, please refer to item Number NN 3-266-73-207. Shipment will be made within six weeks of receipt of the order. Additional information about the ROS File is available from the Directorate of Economic and Policy Analysis, Branch of Disclosure Policy Analysis, (202) 272-7408.
